

# Litteraturliste til temaet om Stammen hos voksne

## Baggrund for søgning

Litteraturlisten er baseret på systematiske litteratursøgninger om stammen foretaget hhv. i forbindelse med udarbejdelse af et vidensnotat om mennesker der stammer i foråret 2014 og en opdatering af dette, der nu i stedet udgør et tema om stammen hos voksne, i vinteren 2017. Søgningen er suppleret med basis- og anden faglitteratur om stammen samt søgning på hjemmesider.

Målgruppe:

Målgruppen i temaet er voksne mennesker, der stammer.

Tidsmæssig afgrænsning: 2012 - 2017

Der er anvendt følgende søgetermer i søgningen:

Stammen ("stuttering") + "social phobia", "delayed auditory feedback", "non-avoidance", "approach-avoidance", "fluency shaping", "easy onset", "cognitive behavior therapy", mindfulness og "acceptance and commitment therapy". Som supplement er der også søgt på "stuttering therapy", "stuttering treatment", "treatment of stuttering", "prevention of stuttering", "stuttering modification" og "stuttering management".

Ordene er trunkeret og kombineret på forskellig vis, og de fundne resultater er gennemset og relevansvurderet (bl.a. ud fra kriterierne om målgruppe, metode, implementering, effekt og økonomi), og de åbenlyst ikke-relevante referencer er sorteret fra.

Der er søgt efter litteratur i følgende referencedatabaser og hjemmesider:

Internationale:

- CINAHL
- ERIC – (EBSCO)
- MEDLINE
- PsycINFO - (EBSCO)
- SocINDEX – (EBSCO)
- Social Science Citation Index – (Web of Science)
