

# Søgning til temaet: Medfødt døvblindhed

**Tidsmæssig afgrænsning:** 2000 – 2015. Søgningen er foretaget i juni 2015.

**Målgruppe:** Personer med medfødt døvblindhed

**Typen af litteratur:** Forskning, grund – og håndbøger samt litteratur på niveau med det styrelsen selv udgiver.

**Fokus på:**

## *Internationalsøgning*

Emnet for søgningen er medfødt døvblindhed og kommunikation, sidstnævnte ifølge det udarbejdede afgrænsningsskema forstået som ”En form for interaktion hvor mening bliver overført og delt ved hjælp af udtryk som bliver opfattet, tolket, forhandlet og bearbejdet”. Kommunikationsbegrebet er således meget bredt og det afspejles også i den fyldige litteraturliste.

For at få et indtryk af mængden af litteratur, relevante søgetermer osv. blev der indledningsvist foretaget en pilotsøgning i baserne PsycINFO, SocINDEX og CINAHL.

Denne søgning viste bl.a. at det ikke gav mening at benytte søgetermen for kommunikation og synonymer herfor, da kommunikation i denne forbindelse skal forstås mere komplekst og bredt.

På baggrund af erfaringerne med pilotsøgningen blev der tilføjet en del emneord (synonymer og beslægtede termer for taktil kommunikation), en ekstra database blev tilføjet (Social Science Citation Index) og den tidsmæssige afgrænsning blev udvidet fra 2005-2015 til 2000-2015.

## *Nordisksøgning*

I nationalbibliografierne og de bibliografiske databaser er der søgt på forskellige varianter af begrebet døvblindhed og på relevante kombinationer og døvhed og blindhed samt forskellige begreber for kommunikation. Der har været foretaget en indledende relevansvurdering af de i søgningerne fremkomne referencer, med en frasortering af de referencer som ligger udenfor den emne mæssige afgrænsning. Referencer, hvor der har været tvivl om den emnemæssige relevans, er medtaget i oversigten. I de tilfælde hvor søgningerne har identificeret relevante referencer, der er publiceret på engelsk og udenfor norden, er disse medtaget i oversigten.
