

Søgning, anvendt litteratur og andre kilder

Den anvendte litteratur i vidensportallet er baseret på en bred søgning af systematiske reviews, meta-analyser, internationale peer reviewede artikler samt rapporter om børn og unge med epilepsi og indsatser til målgruppen.

Søgning

Tidsmæssig afgrænsning

2005 -2015. Søgningen er foretaget i december 2015 - januar 2016 og senere suppleret med artikler publiceret efter januar 2016 og enkelte referencer før 2005. Derudover er der suppleret med artikler fremkommet via centrale reviews og rapporter.

Målgruppen:

Søgningen blev indledningsvist foretaget bredt med fokus på både børn, unge, voksne og ældre. Der er søgt særskilt på temaerne: rehabilitering, psykosocial intervention/CBT, mestring/coping samt specifikt på Indsatser til mennesker med udviklingshæmning og epilepsi. Ud fra resultatet har Socialstyrelsen valgt at fokusere på temaet indsatser til børn og unge med epilepsi
